

QNetworkAccessManager

SNetworkManager::Router

NetworkAccessManager

```
graph BT; NetworkAccessManager --> QNetworkAccessManager; NetworkAccessManager --> SNetworkManagerRouter[SNetworkManager::Router];
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'NetworkAccessManager'. Two arrows originate from its top edge: a blue arrow pointing diagonally up and to the left to a white box labeled 'QNetworkAccessManager', and a green arrow pointing diagonally up and to the right to a white box labeled 'SNetworkManager::Router'. This indicates that 'NetworkAccessManager' is the base class for both 'QNetworkAccessManager' and 'SNetworkManager::Router'.
